COLLABORATION • EFFICIENCY • PAYABLES

Does it take a mound of paperwork, emails and phone calls to get your vendors paid? There's an easier, more efficient system that will keep your vendors content and streamline your accounting process.

CPS' **FieldCollaborate** construction management software provides tools for managing payments to vendors. And, the payment controls are part of the lot schedules that your field personnel and vendors already use to manage their construction activities.

The superintendent simply marks completed tasks as "approved". Accounting can then run reports to see the items approved for payment by *day, job or vendor*. The payments can also be processed *automatically* through 3rd party accounting software integration. Either way, there's no need to track down the superintendent if a vendor calls with a payment inquiry.

An efficient payment system is an important component in a builder-vendor working relationship. Vendors appreciate expedited payments for approved work. Accounting appreciates an efficient and simple payment system. Superintendents appreciate the minimal involvement.
